Information of Students in Route

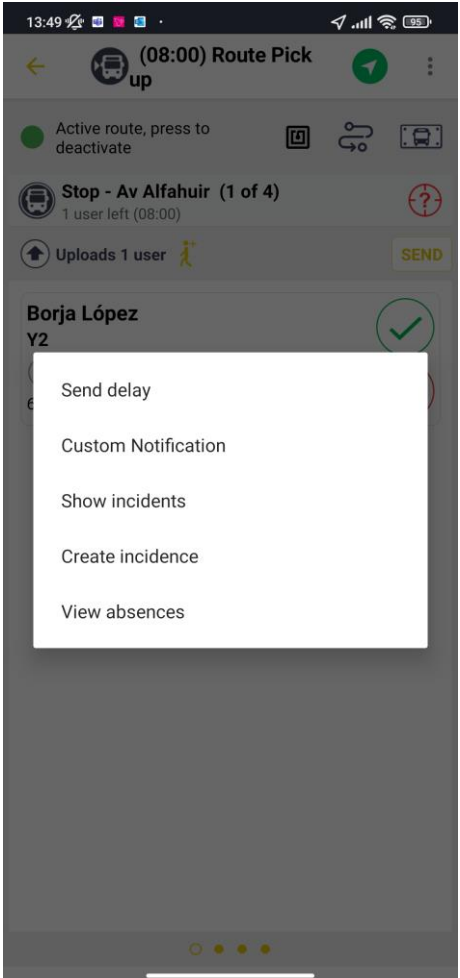

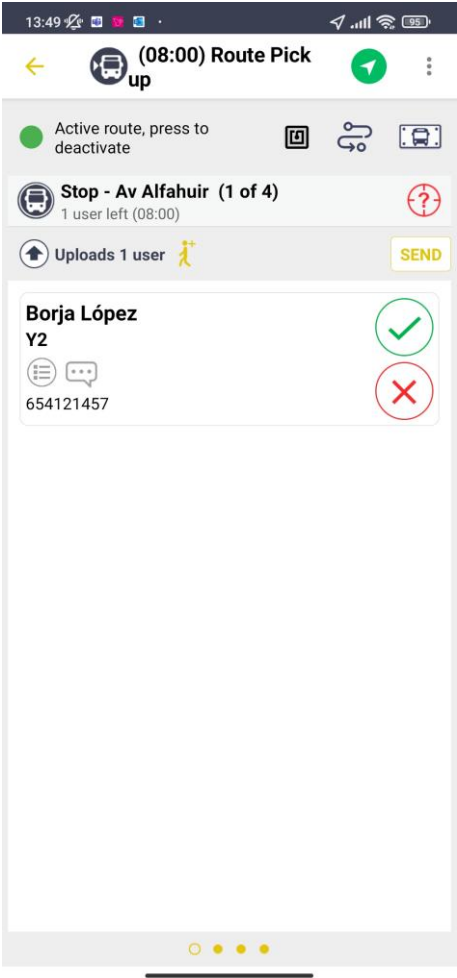

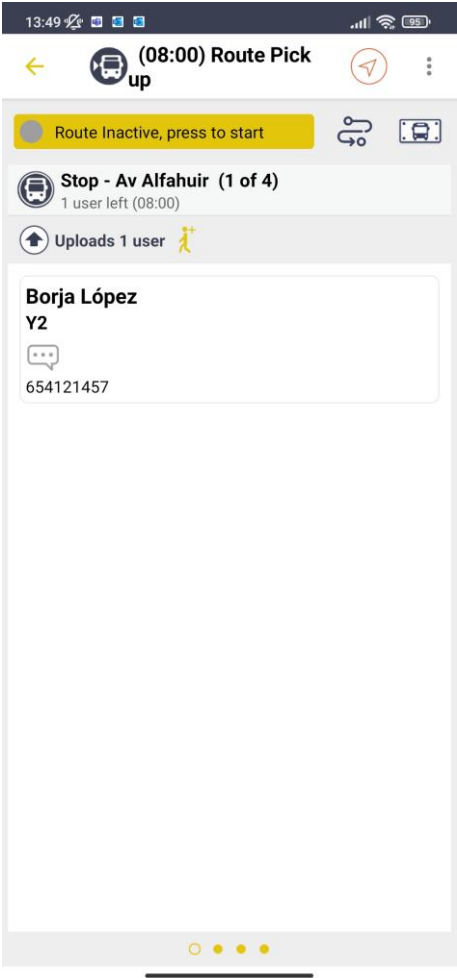

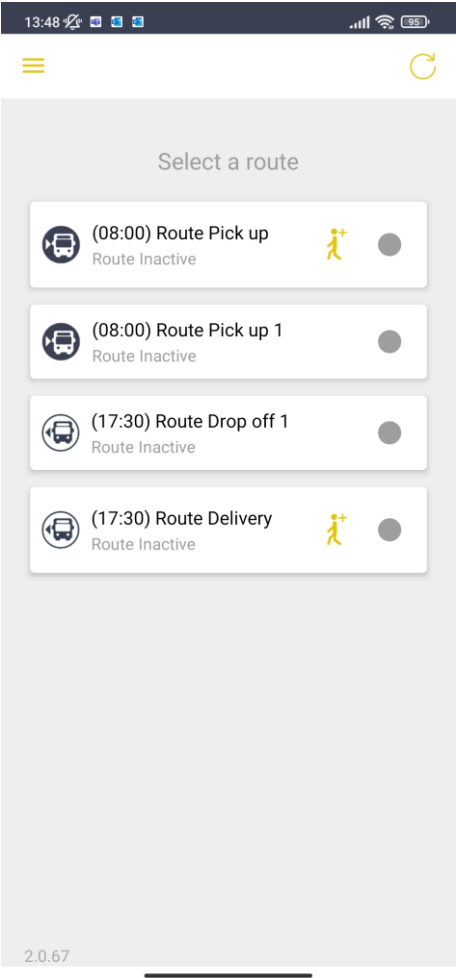

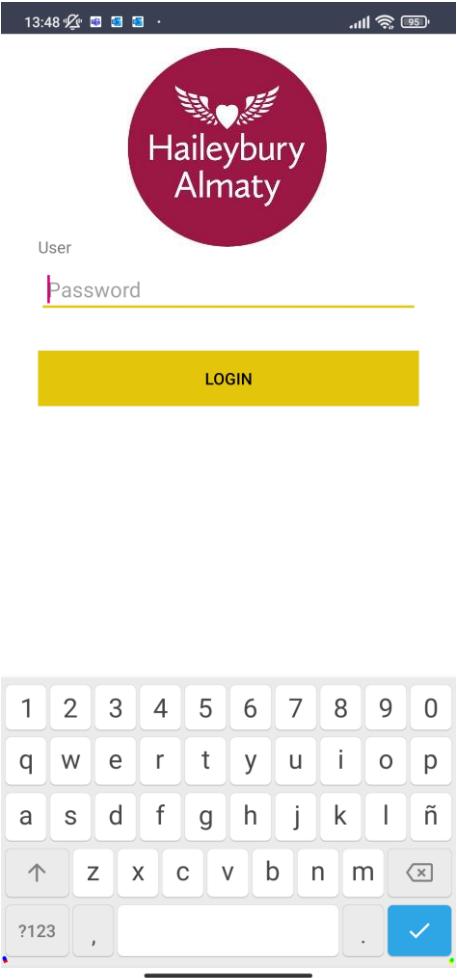

Report	Comments	Execute
Students - Status	Information of the events registered in one or more routes on students or on stops taking into account expected hours and actual hours of operation. The information can be extracted for a day or a set of dates.	<div>Launch</div>
Students - Annotations	Report that shows the notes recorded by the monitors to the students in a time range.	<div>Launch</div>
Students - Absent	Report showing students with absences registered in a time range.	<div>Launch</div>
Students - With Observations	List of students by route or routes that have observations to take into account in the operation.	<div>Launch</div>
Students - By Agrupation	List of students by group to which they belong.	<div>Launch</div>
Students - By Route	List of students by route of which they are users and their corresponding stop.	<div>Launch</div>
Students - No Route	List of students who do not have an assigned route. This will allow you to easily identify students who are not assigned to at least a delivery or a pickup route.	<div>Launch</div>
Students - Transportation Use	Summary information of the uses made by the students of the routes configured in a period of time. This information may be useful in cases where the service is billed according to the days when the service is used.	<div>Launch</div>
Students - Tutors	Related information of students and their corresponding tutors, being able to filter by route or student.	<div>Launch</div>
Students - Without Tutor	List of students who do not have a tutor assigned and therefore do not have a user of the parent APPs	<div>Launch</div>
Students - Time en route	List of students who pass in route more than a given time.	<div>Launch</div>
Students - Total students transported	Summary information on the number of total students transported during the selected period	<div>Launch</div>
